

<p>Interconnection of Otay Mesa Generating Project</p>	<p><b>Figure 3.8-1.</b> The existing Miguel-Tijuana 230 kV transmission line passes through residential, undeveloped and institutional lands from the south end of Eastlake Greens (a, b and c) to the northwest end of the Eastlake subdivision (d).</p>	
<p>URS Corp.</p>	<p>2001</p>	 <p>The figure consists of four photographs labeled (a) through (d).  (a) An aerial view showing a residential development with white houses and red roofs, situated on a hillside. A large transmission tower is visible in the foreground, and a dirt road runs alongside the houses.  (b) A ground-level view of a dirt road with a fence on the right. In the background, a large transmission tower stands in a field of dry, reddish-brown vegetation under a clear sky.  (c) An aerial view of a large institutional facility, identified as Eastlake High School, with several large buildings and parking lots. A transmission line runs through the landscape, and mountains are visible in the distance.  (d) A ground-level view of a two-story house with a red-tiled roof. A transmission tower is visible in the background, and a wooden fence is in the foreground.</p>
